I want the future for me, my friends and family and the world to have a positive prognosis and as far as I can see CSG contradicts this outcome. We have so many amazing oppurtunities for renewables yet our politicians are just saying NO. This defies logic. I want to feel proud of being an Australian again but at present I feel shame... Lets look further ahead than the next election and securing our seats lets create something we can all be proud of and that will ultimately create more long term jobs and a better world for all.

Thanks
