Subject: Unconventional Gas

To whom it may concern,

I would like to make an objection to mining for unconventional gas in Seaspray as well as the wider community of Gippsland and Victoria on the whole. This is a destructive and devastating of our food bowl, our water sources, our environment and our tourism. If you allow this to go ahead you will be giving the Green Light for all our livelihoods, our homes, our food, our water to be destroyed and once this process has begun there will be no going back.

What are we leaving for future generations? A climate that is too hot, contaminated soil and water and all for a few more billion dollars for some people and a lot of grief and sorrow for so many more.

Enough is Enough, please do not let Unconventional Gas mining be our future.
