Dear Sir/Madame,

I am writing to voice my opposition to fracking in Victoria. The main reason is the possible threat this poses to soil and water conditions. Even with all possible safeguards in place there is always a certain risk with severe consequences. Our natural resources are worth more longer term than the short term profit for a few from fracking. Lets spend this money on renewable energy instead where everyone wins, not just a few with the rest paying the price for it.

Kind regards
Trude Ellingsen
