I write to oppose any coal seam gas Fracking in Victoria. I am concerned about the impact this may have on the local environment and the health of local residents, particularly with respect to water contamination and air pollution levels. I believe that the regulations related to these risks and enforcement of them are inadequate. I believe our money should be spent on exploring and promoting renewable energies.

In short, I believe that the potential risks outweigh the benefits for Victorians and that CSG Fracking should be banned.

Thank you.
