Subject: UCG

My name is Barbara White and I am writing to ask for common sense to prevail regarding this dangerous and destructive industry. I live in one of the most productive, fertile and beautiful areas in Australia, called Gippsland. Our soil is exceptionally fertile, we produce magnificent crops of vegetables and it is a huge dairy industry also. We all know that in the future growing food to supply an ever growing population is our greatest problem. It would be insanity to destroy fertile areas of land anywhere in Australia but especially in Gippsland!

I hope and pray that common sense will prevail in regard to UCG, please think of the future and do not destroy our magnificent fertile land.

Barbara White
