

Thank you for accepting this short submission into the Parliamentary Enquiry.

I believe that Victoria, and all of Australia should have a permanent ban on the exploration of Gas in our farmlands and country side.

I have seen evidence of foul water in the United States from 'fracking' and it is very distressing to think that we ight go down that path.

I believe that any regulations about safety would be fruitless, according to the experience in USA and also from our Hazelwood fire.

We know the scandalous way that was handled.

Please ask our Parliamentarians to focus on clean energy. That is what people want.

Sincerely,

Annette Madden
