As a relatively new arrival to Moriac, (5 years) I am extremely concerned that the area that my family have chosen to make our home is under threat of CSG mining.

The negative environmental impacts have been proven time and time again, the disruption to local community is enormous with noise and transport vehicles tearing through the town.

If the greedy mining companies think they can sell it to the community by promising jobs, then think again.

Our community is not up for sale and we stand strong, united against these companies setting up operations in or nearby our town.
