Subject: Submission to the Environment & Planning Committee Inquiry into Unconventional Gas in Victoria

To the Environment and Planning Committee,

Please do not allow CSG exploration of any kind or investment in this unacceptably environmentally damaging industry in our beautiful state of Victoria. Any perceived short term gain or benefit is far outweighed by the cost to public health and safety, access to clean water and the many, many proven detrimental impacts of this toxic gas extraction technique.

My household has a planned phasing out of gas appliances as we want no part in creating a demand for GSG. Instead we'll be investing in high efficiency electric hot water, heating and cooking and sourcing the energy for these from clean, green suppliers.

Any consideration of pursuing CSG demonstrates a complete disregard for the wellbeing of future generations as it will leave a toxic legacy that no amount of money or technology will be able to reverse.

I implore you to take the responsible, intelligent road of protecting Victoria from this industry. We do not want it in our state or any where in Australia.

Nickee Freeman
