

I ask the Government to please consider a permanent ban on all unconventional gas.  
Rather than short term gains please, please consider the health and future of our children and grandchildren. According to the Australian Energy Market Operator, there is no shortage of gas in Victoria or anywhere else in Australia so why would you risk the health of agricultural land and future food supplies. Protect the already existing employment opportunities in agriculture and tourism by investing in zero emissions and renewable energy such as the sun and the wind.  
A Victorian gas industry will not save the consumer money in the long term. Look ahead and insure the future well being of tourism and agriculture and protection of those who reside in Victoria from harmful emissions.  
Consider future generations. Please don't leave them with the detritus of your focus on a quick money making venture with long term harmful outcomes.  
Be the one State Government who can look beyond the almighty dollar and stand up for people!  
Thankyou  
Wendy Saphin
