Subject: Fracking in Victoria

[REDACTED] [REDACTED]

Dear Ministers,

I wish to record my absolute opposition to any form of fracking in Victoria. We now have available all the technologies needed to meet our power needs today and into the future. What we require are brave politicians who are prepared to legislate for development of alternative energy resources, to support those technologies with additional finance for research and industry, and to thus create numerous jobs as a result. Stop making holes in and under the ground, and harness the energies we have in abundance!

Yours sincerely,
Hilary Da Costa
