Subject: fracking

Hello,

As a citizen of Victoria I am opposed to the process known as fracking and ask the current government not to fall prey to the pressures of this dirty industry.

It is bad for farmers, the quality of the land and ground water, and can impact tourism. Australia has abundant natural gas supplies without resorting to fracking.

Let us consider the long term consequences of our actions instead of short term gains, and with fracking that is exactly what has occurred in other parts of the world, destruction of environment and a short term industry that makes

money and leaves the environmental problems to government.

Thank you for your consideration.
Priscilla Brady
