

RECEIVED 3 JULY 2015

The Standing Committee on the Environment & Planning.
Parliament House
Spring Street
East Melbourne
Victoria. 3002

Dear Committee Members,

It is with great concern that I write and voice my concerns over any proposed gas mining in any area of this state of Victoria.

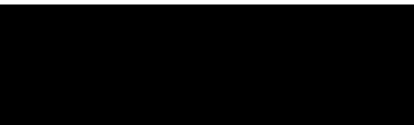

I have read many articles on the dangers associated with this type of mining.

As a consequence of any mining of this nature my farm could be damaged beyond repair. The risk is permanent water contamination. This would ruin any feed and water for stock produced on this farm for my family's needs and saleable stock consumption. The whole area of this Green Triangle region of Victoria could be devastated by any mining of this nature.

You the Members of Parliament hold the responsibility of not allowing this mining practise to happen.

I look forward to your response to this critical matter.

Yours sincerely,

Mark Holman BT
