Subject: Fracking in Victoria

[REDACTED] [REDACTED]

Hon. Members of Victorian Parliament.

- * Please help prevent fracking and other unconventional gas to protect existing jobs, in tourism and agriculture.
- According to the Australian Energy Market Operator, there is no gas shortage in Victoria or anywhere else in Australia, so there is no need to risk the health of crucial farmland just to extract gas that we don't need.

* Victoria needs to be a leader for bore net emissions

Thank you for your consideration, Ann McAlpin
