According to the Australian Energy Market Operator, there is no gas shortage in Victoria or anywhere else in Australia, so there is no need to risk the health of crucial farmland just to extract gas that we don't need.

Victoria needs to transition rapidly to zero net emissions. There is growing evidence of fugitive emissions (ie. leaking) from unconventional gas processes, showing that gas is not as clean as once thought, and there is no time for fossil fuels that are just less dirty. Gas therefore has no place in Victoria's future energy mix. If Victoria is to be considered a leader on climate change, the government cannot allow a new gas industry to be established.

PLEASE DO NOT RISK THE SAFETY OF VICTORIA - it's environment or the people.

Thank you,  
Jessica
