SUBMISSION CONTENT:

--

My reasons for making a submission on the parliamentary enquiry on Unconventional Gas in Victoria include:

1. Although I am a resident of Melbourne I am a very regular visitor to country Victoria, especially East Gippsland and the Ottways. The appeal of these areas is their natural beauty which must be preserved for the future health and enjoyment of all visitors and locals, including the flora and fauna of the area. I am greatly concerned of the loss of this magnificent heritage for the future.
2. My concerns against onshore unconventional gas also relate to food security, because of contaminated water and depletion of the water table.

Please take into consideration the future of Victoria for the current population, future visitors, and more importantly the preservation for the generations that are to follow.
