**Subject:** Farmers rights

The rights of farmers should be protected by law. We are the biggest economic contributor to this country and the government needs to start to realise this.

You get more jail for braking in too an old shop than a farm. This has to stop. The courts need to start giving the right penalties for the crime.

5 years jail should be the norm for anyone who intentionally enters a farm with the ideas of stealing, or disrupting business. This is because bio security would be comprised.

Regards

Peter thompson.
