

Inquiry Name: Inquiry into the Impact of Animal Rights Activism on Victorian  
Agriculture

**SUBMISSION CONTENT:**

--

There must be a tough stand on these animal extremist groups.  
They are trespassing on private land, stealing animals and generally causing terrible  
heartache to many farming families.  
I feel as though as soon as we farmers speak out and defend what we do in social media,  
we are a target.  
I have been on the receiving end of some shocking abuse. These people are causing so  
much trouble that people live in fear of being targeted in their own homes. The law needs  
to tighten up & harsh penalties given so it may act as a deterrent to other activists.  
The Aussie Farmer does not deserve any of this and the law needs to toughen up and  
protect the very people putting food on everyone's tables and clothes on their backs.
