Inquiry Name: Inquiry into the Impact of Animal Rights Activism on Victorian Agriculture

**SUBMISSION CONTENT:**

--

Farmers do their best to respect animals and people alike in their farming practice. Animal activists are not respecting farmers, their land or the people working with the animals. It is a crime to trespass and act brash and violently toward farmers who are trying to sustain Australia. If the activists were treated the way they treat others, I am sure they would be rallying to stop such disrespect. Please, support and sustain farmers, they really are what is holding and supporting Australia.
