Im.a small primary producer yet we've had people on one property cut our fences 4 times to let our cows run free. Well they are so well taught they walked back to the paddock gate to be let in. My husband and I would go out and fix them. So annoyed at phone calls, rants on our emails, etc that we now have biosecurity signs up. We have signs on external paddock fences, electric wires on all fences and we check stock morning and night. We are small in comparison and an organic farm but it didn't stop bullies. Both my husband and I developed depression from undue stress. Why must farmers jump through hoops, red tape and prove our innocence? we have done nothing wrong. WHY is MY government siding with the activists? If someone broke into a parliamentary building security would pounce. WE ARE EQUALLY AS IMPORTANT AS OUR POLITICIANS. Activists deserve \$50,000 fine and 12months community service. Minimal time served. Repeat offenders should have this rejected for 12mths jail. Breaking and entering by our law equals what activists do. So charge with full force of the law!
