Inquiry Name: Inquiry into the Impact of Animal Rights Activism on Victorian Agriculture

Ara Cate

**SUBMISSION CONTENT:**

--

These new laws targeting animal activism are unacceptable. The public have a right to know how and where they are contributing to animal rights violations and violence. If the government refuses to adequately police the poor treatment of animals in the agricultural industry then we need ways off having this brought to our attention. Animal activists do the country a great service by exposing cruelty and violence that would otherwise escape notice and prosecution.
