Please Help

This is not ok

There should be some way of allowing people to go into workplaces to take footage of animal cruelty, this is the only way it can stop. I agree activist should not got into private areas of farmers homes, but where there is workplaces it should be allowed .

If it wasn't for activists and whistleblowers work , not if this would be known .

I find this disturbing what is happening to animals and pray one day this will all end ..

Please help to make this stop

Kind regards

Julie
