

Inquiry Name: Inquiry into the Impact of Animal Rights Activism on Victorian Agriculture

Ms Jacquelyn Farragher

SUBMISSION CONTENT:

--

The way animals in animal agriculture are treated is abhorrent. Farmers and industry shouldn't be allowed to treat living beings this way, and they shouldn't be able to silence whistleblowers and people from gaining footage of their atrocities to share with the public. We would commend these people as hero's if what they were exposing was abuse to companion animals like dogs or cats, or even to other human animals. But because you see farmed animals as food, they have no rights and are treated as such.
