I am so disappointed at this new impending law to silence the truth. Every account that a Whistle-blower has presented and came forward with is usually horrific and the Australian public been appalled and horrified.

How can our government suggest that these cruel practices should be allowed to continue under the veil of secrecy & protected by legislation. At the moment I am ashamed to be Australian with this government supposedly acting on my behalf. I unequivocally oppose this legislation. Are we not a Democratic Society with free speech and access to the truth?? I feel we are becoming like a Communist country where our souls are being sold and the farmers, the meat industry & the dairy industry are ruling the roost & trying to run the show.

I was exposed to the truth re: animal farming 5 years ago and I am so angry it was deliberately hidden from me for so many years as I would of chosen a healthier and more compassionate lifestyle had I known. So many lives could have been saved, human and animal, if this knowledge was made public years ago.

Farmers, the meat industry plus agricultural workers need to be held accountable for the welfare of their animals, which they are not!! Why is that?? These industries must be held accountable and not shooting the messenger ie: The Whistle-Blower Because as I see it, people who have nothing to hide, hide nothing!
