--

The need to expose the suffering of animals as a result of animal agriculture has never been more necessary than now. The intensity of animal suffering has never been more widespread than it is today as part of the animal agriculture industries. Consumers have a right to know exactly what their spending is contributing to and supporting. Without Animal Rights Activism exposing the truth, consumers would never know what they are paying for. Animal agriculture industries will never disclose the truth willingly as they know good people will stop paying for their cruel and unnecessary "products" and by products I am referring to the tortured, chopped up corpses and secretions from animals who have been bred into a barbaric, unethical, unnecessary and planet and health destroying hell on earth of an industry. Animal agriculture should be completely transparent and without animal activists, this will never happen. If farmers believe they are doing no wrong they should invite the peaceful and caring animal activists onto their farms to take footage for the world to see. We know this will never happen. Please, by protecting animal activism, you will be protecting people's right to know the truth. You will be protecting people's right to stand up for and speak out against injustice. You will be protecting people's right to say, this is not OK and we should do better and here are the reasons why. The world needs animal activists. The world does not need an animal agriculture industry based on cruelty and lies and environmental devastation. Please do not take the rights away from people just wanting to make the world a better and kinder place for all. If you were bred into a world of suffering, wouldn't you want someone to speak up for you? Thank you.
