

Inquiry Name: Inquiry into the Impact of Animal Rights Activism on Victorian Agriculture

SUBMISSION CONTENT:

--

Hello.

I am an ordinary person. I go to work every day and enjoy my life cooking new foods and participating in fun runs for charities.

I was deeply concerned when seeing the proposal that whistleblowers and rescuers should receive harsher penalties for doing what I do not have time to.

Those people are so important in Australia due to the fact that our country ignores "farming" animals' inclusion for protection under animal cruelty laws.

Tougher penalties need to be dealt to people breaching current slaughter practices, and then if anything - rescuers and whistleblowers should be entitled to payment/ rewards for their risky behaviour in the name of justice.

Please consider my plea - from your average 8-6 Australian teacher - work with the people who work with compassion.
