Inquiry into the Impact of Animal Rights Activism on Victorian Agriculture

As the footage of a sheep who is fully conscious comes into light today how can we point fingers at animal rights activists when in reality if it wasn't for the activist this cruelty would never been seen. The animal agriculture industry is not properly regulated and therefore there will always be millions of cases if violence and animal cruelty that will never be known if we don't allow activist to get footage of these incidents. This is not an isolated incident and will happen again and again unless we do something about it. Blocking activist is not the answer
