

Inquiry Name: Inquiry into the Impact of Animal Rights Activism on Victorian Agriculture

Ms Jen Cresp

SUBMISSION CONTENT:

--

We need whistleblowers to document what happens in the animal agriculture industry. The consumers have the right to know the horrific conditions the innocent animals are kept in.

Rescuers should be allowed to save these animals.

The government should be helping farmers transition away from animal agriculture and into plant based businesses.

The government should stop trying to stop the whistleblowers. It just appears as if they want to hide something.

We cannot sustain life on this planet if the animal agriculture industry exists.

It is animal cruelty. If these were dogs the whistleblowers would be heroes.

Why do people choose to eat some animals but not others?

Do the right thing.
