We owned 2 taxis licences which were purchased at June of 2016 for \$140k each the licence revocation has put strain on my family's life financially and physically. it changed my life by having to have to work a second job missing out on precious time not seeing my 2 beautiful boys growing up 1 year old and 4 year old . You don't understand these reforms just don't just effect the licence owner but there whole family and 2 innocent boys get less time to see there father.

I have you managed the loss of our regular taxi income By working another job  
What has this impacted?  
Family financial stress which has impacted my health

Did you apply for the fairness fund? If not, why not? Yes fairness fund took about 12 months to receive \$50k

If you did apply for the fairness fund, were you successful?

Yes only received \$50k

The missly \$150 K transition payment has not made this any easier as both licences were much more in value than 75 K each

We have lost a considerable portion of income. Due to the reforms which has put financial stress on our family and health

I would suggest a independent review and to be fairly compinsatotored for our family's assets.

Simon
