**Subject:** Air Quality - three considerations  
**Date:** Monday, 8 March 2021 11:25:48 AM

---

I have three items for your consideration.

1

In 1992, the following 240 page review was published:

Lorimer G.S., Whillans F.D., and Kinhill Engineers Pty Ltd (G Deitch), *Air Quality Monitoring in Victoria - A Review of Air Quality Indicators and Monitoring Procedures in Victoria*, ME1027, Office of the Commissioner for the Environment, Victoria, January 1992.

After almost 30 years, it is somewhat dated, but it may have some value for your inquiry. Research into indoor air quality at that time was in its infancy, however it has since developed.

2

One 17 page review I subsequently wrote was:

F D Whillans, *A Review of Fungal Mould in Domestic Buildings and its Association with Occupant Ill-Health*, The Australian Institute of Building Papers, School of Architecture and Building, University of Melbourne, 6, August 1995, pp89-105.

3

I believe that the inquiry might gain considerably by consulting:

**Lidia Morawska is Professor and Director, International Laboratory for Air Quality and Health; Co-Director for Australia, Australia-China Centre for Air Quality Science and Management.**

Lidia is in the School of Earth and Atmospheric Sciences, Faculty of Science & Engineering, Queensland University of Technology (QUT) in Brisbane, Australia, the Director of the International Laboratory for Air Quality and Health (ILAQH) at QUT, which is a WHO Collaborating Centre on Air Quality and Health, and a Co-Director in Australia for the , Australia – China Centre for Air Quality Science and Management (ACC – AQSM). She conducts fundamental and applied research in the interdisciplinary field of air quality and its impact on human health and the environment, with a specific focus on science of airborne particulate matter. Professor Morawska is a physicist and received her doctorate at the Jagiellonian University, Krakow, Poland for research on radon and its progeny. Prior to joining QUT she spent several years in Canada conducting research first at McMaster University in Hamilton as a Fellow of the International Atomic Energy Agency, and later at the University of Toronto. Professor Morawska is an author of over six hundred journal papers, book chapters and conference papers. She has also been involved at the executive level with a number of relevant national and international professional bodies and has been acting as an advisor to the World Health Organization. She is a past President of the International Society of Indoor Air Quality and Climate.

---

Personally I have been a retiree for over two decades, so I'm unable to provide further help.

I do wish your inquiry well.

Dr Frank Whillans
