YOUR SUBMISSION

Submission:

The quickest and easiest way to help cut pollution is do not impose taxes on electric vehicles. Implement a state wide roll out of E.V. Charging stations.

Stop Powercore and other electricity power providers from robbing the citizens of Victoria on the purchase price of electricity generated by house hold P.V. systems. They have been robbing us blind for years with their gold plated wires and poles, it's now time to put a stop to this dreadful business practice.

Remove the ability of companies like Powercore to shut down P.V. systems.

Allow local grids
