I am writing regarding the reference group submission as per the link.

<https://www.environment.vic.gov.au/sustainability/inner-west-air-quality-reference-group>

Air pollution in Yarraville is atrocious. The old trucks pumping toxic diesel into the air we breathe is something expected in a 3rd world country, not near Melbourne.

I have to wash the house down and just wonder what this is doing to my family's lungs.

The West has been a dumping ground for Melbourne for long enough. We need action to avoid the ongoing high presentation of respiratory disease in the inner West.

It would never occur anywhere else in our city.

Stop ignoring it and do something about it ASAP as you aware of the health implications and are being negligent.
