Subject: Air Pollution in Victoria
Date: Friday, 16 April 2021 10:42:07 PM

Dear Inquiiry,

I have lived and worked in Footscray since the 1990's so have seen the increasing deadly pollution caused by PORT TRUCKS in our residential streets and homes.

I suggest you Google "world's best practice to CLEAN URBAN AIR" and implement the incentives and laws you read about.

Get old polluting trucks off our streets, replace them with electric and low emission trucks - you could google what the Japanese do to encourage old vehicles off their roads.

Move more road freight ONTO RAIL.

Dare to act in the interest of the lungs of poor people of the inner west and overcome our States decades long sell-out to Labor and Liberal's mates in the multi-million dollar trucking industry.

Your Sincerely
Daniell Flood
