

Air pollution Inquiry

Mrs Audrey van den Berg

YOUR SUBMISSION

Submission:

The smoke from planned burns or any burns severely affects my health, and interferes with my breathing. The smoke from the planned burns affect my lungs It is imperative that these planned burns are stopped, The colder air prevents the smoke from dissipating so that the air is polluted for days on end. It is worse than our bushfire of 2019/20. The smoke pollutes our clean fresh air. Please stop burning our precious bushland.
