

## Air pollution Inquiry

Ms Catherine Roadknight

### YOUR SUBMISSION

#### **Submission:**

As an elderly resident of East Gippsland I am always (year by year) dismayed at the level of pollution (carbon dioxide +) that is put into the air around this time. We are horrified at what happens in the Amazon and in Indonesia, so why are we (the Victorian Government and particularly our 'environment' minister) not horrified at Victoria polluting the atmosphere with even more carbon dioxide+?

AS a 75 year old who is probably a sitting duck for covid I'm aghast that you happily pollute my lungs and the lungs of all young children, particularly those that suffer more and more from Asthma. (What a surprise!) We have had meetings with DELWP to express our dismay and depression at what is being done, but obviously these meetings were just to tick a box that they'd consulted with the locals. So cynical!!!!!!

Having moved to East Gippsland 17 years ago to enjoy nature, I'm appalled at the constant and unrestrained destruction and pollution that the LABOR (I can't believe it) government promotes and pays for, whilst scientists attest to the fact that burn offs DRY OUT OUR FORESTS and make it more likely to burn in a bushfire.

I can only resign myself to the fact that in order to stay in power our beloved Labor party has sold its soul to the logging companies and using tax payers money to do it. So insane!!!!!!

My daughter and I (She has a lung condition) are extremely DEPRESSED. Has the government thought about the fact that the constant rate of deliberate destruction of Nature is one of the leading causes of depression in our up and coming young generation? They see NO HOPE for their future. Actually, I'm not only depressed, but I'm angry that OUR government is still prioritising corporations and unions over its people and their health.
