Subject: Submission to the Parliamentary Inquiry into the Health Impacts of Air Pollution

Dear Michael,

ALiVe Inc made a submission to the Parliamentary Inquiry in late April.

In preparation for our submission, we surveyed the local community in the Latrobe Valley on the impact of existing and planned industry in the region.

We have continued to solicit survey responses in the hope that we can present these to the inquiry when the hearings are scheduled.

We are currently eliciting some interesting responses and are seeing trends in significant ill health from existing industry and decisions to move from the region due to upcoming industry entering the area.

The surveys will be themed and key trends will be collated for easy analysis and reading.

I wanted to confirm that:

- a) we were able to present new information to the hearing
- b) whether there was anything else I needed to organise to ensure our community's voices are heard

Please let me know if there is anything I can do in preparation for the hearing

Kind regards

Maggie Jones

Secretary

ALiVe Inc- Advocating for the Latrobe Valley
