Submission:

I feel like there needs to be more emphasis put on cleaner fuel options, making public transit cheaper and more readily available, more trains, trams, buses etc per hour to encourage people to take those options rather than drive. Encourage locals to stay local for work etc (either thru more WFH options or building up regional centres to be more accommodating to workers) so they don't have to commute from regional living locations to work in Melbourne. Fix the NBN system so it works properly and more people can actually WFH instead of commuting all the time for work. Make Victoria a fore running in green technologies so we can show Australia and the world that we are doing what we can to lower pollution and energy consumption.
