Subject: Parliamentary Inquiry submission

Categories: Submissions

Full name: Mutullah Can Yolbulan

Address: [REDACTED]

Is public? Yes, I would like my submission to be public.

My submission:

I want future generations to have a viable future. I want them to be able to go outside and breathe fresh air and enjoy 4 seasons.

Most importantly I am sick and tired of destroying the environment to fund the global capitalist system to enrich a few monopolies.

I want workers to be represented on boards of energy companies. I want the First Nations people to have the right to veto any energy projects.

This world is ours and we must change the way we live so that all generations can enjoy this beautiful planet.

I want the GDP calculations to include social and environmental value.

I want environmental justice.

PEOPLE BEFORE PROFIT.
