--

We have seen too much destruction, wanton destruction for profit, of the environment around the world. Australia has a very poor record in terms of species extinction.

Do we humans really think we can get away with this. Biodiversity is critical to a healthy environment, healthy soil, healthy plants, and healthy people.

Victoria needs to give its population hope that by protecting biodiversity we will all be better off.

Please put the environment before profits, and before our human nature to want more and more.

It's time we gave back.
