I am appalled by the inadequate laws to protect Victorian biodiversity, the ongoing decline of our environment, the loss of wildlife and their habitat is deeply concerning to me.

With predictable climate change catastrophes ahead of us and the risk of further bushfires, it is imperative we have better laws to protect our environment.

From the perspective of our First Nations people and their Elders who have lost so much since colonisation we must do more to protect their sacred sites, their natural bushland and wildlife.

We must stop logging old growth forests! I am deeply saddened at the impact of logging at Old Pats Creek and the Warburton Ranges. Logging of old growth forests must cease. We must find alternatives to logging beautiful trees and associated habitat for so many species of animals at risk.

Please do something to protect our environment and our eco system.

We must also end the production of plastic, we need to find more innovative ways of managing our recycling and our waste management needs greater attention to ensure less landfill and greater care of this earth, we call home.

Thank you for your attention to these issues that I care deeply about and seek leadership and urgent action.

Yours sincerely,

Jenni Thompson
