Subject: New Submission to Inquiry into Ecosystem Decline in Victoria

Categories: Submissions

Inquiry Name: Inquiry into Ecosystem Decline in Victoria

Mrs Judy Rees

SUBMISSION CONTENT:

--

More protections are required, not less, for the environment.
With little action in reducing emissions and therefore Climate Change, all levels of government need to step up massively.
Traditional owners must be listened to as they have always taken care of their land and wildlife.
Longer lasting and more severe droughts and fires due to Climate Change must be acknowledged and taken into account.
Logging needs to be ceased and logged and burned areas restored.
To see our State and Federal Governments not acting with urgency re our endangered, threatened wildlife is devastating.
We have the highest rate of extinction but little is done.
Instead of growing our population we need ZERO population growth for our world to survive.
Why is Victoria still logging areas where threatened species are trying to survive?
Nature and wildlife means everything to me, I am often in tears at viewing or reading about habitat and wildlife loss, knowing how little governments around the world are doing to reverse this terrible trend.
I have children who will have their own, with trepidation, so it is vital I keep doing what I can to ensure a good future for them. This means voting for a government that knows what real sustainable economics is.
