Subject: New Submission to Inquiry into Ecosystem Decline in Victoria

Categories: Submissions

Inquiry Name: Inquiry into that I cannot believe these submissions are even necessary. This is a matter of life and death and not just the amazing biodiversity of Victoria's forests, which are so critically endangered, but the live of humans. We cannot exist without a thriving forest eco system.

It dies, we die. There is NO debate or compromise.
Jobs will not matter is our planets life system dies. Each species both flora and fauna are vital to the balance of life. If you take humans out of the picture, life on this amazing planet with thrive. Take out or destroy the natural balance of that life and we CANNOT survive.

Please wake up and start to put all life front and centre not just business .

If people cannot survive without particular jobs then our society has a real problem. NO industry is worth the destruction of our forests and the life , including our own, that it supports.
