Subject: New Submission to Inquiry into Ecosystem Decline in Victoria

Categories: Submissions

Inquiry Name: Inquiry into Victoria has been progressively wasted on wood chips to Japan. Wood chips line the road of East Gippsland blown from trucks zipping off with thousands of years of growing life

What is Australia without its environmental identity? A frazzled European farm with no water and

dust storms.

Foreign Animals chewing through the last remnants of nature, and all the native animals treated like pests.

We give away our identity for a few jobs and a little cash.

We need to preserve what is left,

and there is not enough right now. Extinction, drought and no water with global warming increments every year.

What Barrier Reef? What old growth forest? What greater Glider possum?

What orchids, what native grasslands with grain, we have NEVER tasted that is adapted to this country?.

Environmental protection is necessary because nature keeps giving and business only drip feeds the economy for a short time.
