SUBMISSION CONTENT:

--

I am writing on behalf of my grandchildren and their grandchildren's grandchildren ie those who are nor yet born, to implore you to frame your environmental laws to protect the forests and wild places of Victoria.

Please cease logging them and protect them for the inestimably precious places that they are.

Our unique wildlife needs these places to live and thrive.

Human beings need to have forests kept in perpetuity for us to explore and love. They restore our spirits and nourish us for we are not separate from, but part of them. Ecosystems with the wild creatures who depend on them for life, need to remain intact for each one depends on others to keep the chain of life complete.

You have the power to protect them. As our elected representatives please honour this request and fulfil your responsibility.
