Dear Sir/Madam

I am writing to convey my concerns regarding ecosystem decline in Victoria with subsequent loss of species. Bushfires ravaged Victoria earlier this year where multiple species were killed and their habitat destroyed. I firmly hold the view that it the Governments responsibility is to do everything to protect our environment and not make decisions that add to the destruction of both species and habitat. Logging in my opinion has both of these destructive outcomes.

I am a keen bushwalker who treasures the opportunity to walk in pristine environments that are home to a wonderful landscape and environment that nourishes and sustains both plant and wildlife species. Forests are vital to contribute in a positive way to climate which in more recent time has been having catastrophic effects both on communities and ecosystems.

The Government by sanctioning logging further contributes to the damage of environment, species and ecosystems. I implore you to safeguard and protect our forests, our landscapes, and every species in every way you can fork the benefit for future generations.
