

Hello

My name is Jonathan Ingram [REDACTED] and I'd like to see more done to protect Victoria's ecosystems and native wildlife.

I enjoy hiking, mountain biking, motorcycle riding throughout this fantastic state, however it's clear that Victoria is not doing enough to protect our environment.

I also run a hiking business taking guests on walks along the Great Ocean Walk, Grampians and Wilson's Promontory National Park and it's clear that we are not allocating enough resources to the protection of our environment. There are issues like the bushfires, explosion of deer population, rubbish and pollution and scarce resources like park rangers, ecologists etc. to ensure our environment is a priority.

The fact that we are the most land cleared state in Australia is an embarrassment.

Please invest in our environment and native species to ensure future Australians have the opportunity to do so.

This statement can be made public

Cheers
Jonathan Ingram
