SUBMISSION CONTENT:

--

Stop the barbaric abuse and disregard of our unique, amazing, defenceless wildlife through poisoning - for Earth killing animal agriculture, poisoning to make way for farm animals.

These are the pieces that so many often don't put together - the destruction of wildlife and habitats often goes hand-in-hand with animal agriculture. And we must make sure it is understood.

Attention Parliamentary Inquiry into the biodiversity emergency and extinction... We must learn to co-exist with native animals, as well as value wildlife by creating penalties that fit heinous crimes against them.

It's time to evolve from being smart monkeys and become conscious beings!

Sincerely
David Austin
