

Dear committee,

Thankyou for conducting this inquiry

My submission is brief.

The government needs to do everything it can to protect and encourage all natural life forms, particularly the animals, and save the planet from climate change and its destructive effects on the earth.

I am FOR a vegan world as part of the solution to the planet's crisis.

COVID-19 and many diseases have been proven to have their origins to cruelly murdered animals sold for human consumption.

That is a sign that for humans to thrive, we must respect all other life forms and in particular all adopt veganism.

Angela Cox
