Subject: Submission for enquiry into the extinction of native animals
Date: Friday, 8 May 2020 1:25:17 PM

Hello,

My name is Naomi Wang

During the COVID 19 restrictions my five year old daughter and I have been doing nature walks in our nearby parkland. We have started doing birdwatching and toadstool spotting to make it more interesting and educational for her. We have noticed an increase in the bird life locally and that has made me reflect on what is ahead for the environment. Before lock down we would frequently visit zoos and learn of extinction. We would sit admiring the animals and feel privileged to be alongside them. My reason for supporting this enquiry is personal as I want to continue sharing this with my child. I want her to know that the society that she lives in values nature as much as the two of us do. Now more than ever.

Thanks for your time

Naomi wang
