Subject: Extinction crisis

Categories: Submissions

Thank you for reading my submission.

More needs to be done to protect Victoria's unique flora, fauna and fungi.

Logging should be stopped immediately. The Leadbeaters possum and the greater glider and our koalas can't wait another ten years. They will be gone.

Salvage logging should be banned immediately. Our wildlife have precious little habitat left and the rapacious Vicforests still consumes it - for wood pulp. It is a travesty.

That is all.

Marie-Louise Drew
