Subject: New Submission to Inquiry into Ecosystem Decline in Victoria

Categories: Submissions

Inquiry Name: Inquiry into Ecosystem Decline in Victoria

Mr Dylan McDermott

SUBMISSION CONTENT:

--

The World is on the precipice.
We can no longer ignore this or our species well become extinct.
This virus is just a dress rehearsal for what is to come
The pentagon has predicted its own collapse by 2050
We have till 2030 to lower our emissions to avoid 1.5 degrees average temperature rise, or we run the risk of runaway climate change that will set in chain events that will destroy us.

What we do as a species in these years, will write history or destroy it. We will either be remembered as the heroes of humanity, or we will be dead.

Our country is the largest drug dealer in the world. Dealing more coal than any other nation. This drug will kill us slowly and we must transition NOW or we will die. We must think about our long term actions. We will profit from a transition, green jobs are the future. We need to listen to the experts on climate as we have listened to health experts.

give the people hope and they will follow. Give them bussiness as usual, and they will turn their backs on you as you turned your backs on them and yourself. Give up on greed, give up on complacency. Make no mistake, this is the most important issue of history, of perhaps the universe. We must evolve, and it starts with the person reading this putting things into action. MOBOLISE THE COMMUNITY there is so much good in people. It will spread like wildfire once you start giving back. Employ the smartest minds, forgive those who disagree but place correct boundaries on the corrupt. Love the earth and its people, because if you dont its not worth saving anyway
